

Improving Your Stations – Southeastern managed stations

Below is a list of planned projects at stations on the Thameslink route that are managed by Southeastern. These are being funded by Govia Thameslink Railway's Passenger Benefit Fund. These projects were chosen following feedback from passengers, local stakeholders and the operator, and we are now doing detailed surveys and design work to confirm that the projects can go ahead. We will add to this list as projects are confirmed, and we have removed schemes which are no longer feasible. For more information, please contact passengerbenefit@gtrailway.com
