

Improving Your Stations – Southeastern managed stations

Below is a list of planned projects at stations on the Thameslink route that are managed by Southeastern. These are being funded by Govia Thameslink Railway's Passenger Benefit Fund. Please note that these projects were chosen following feedback from passengers, local stakeholders and the operator, and we will now be doing detailed surveys and design work to confirm that the projects can go ahead. More schemes may be added to this list. For more information, please contact passengerbenefit@gtrailway.com
