

# Arun Valley

# Timetable improvements

## December 2015

Faster off-peak services will be provided between Southampton / Portsmouth / Bognor Regis and London Victoria via Horsham and the Arun Valley, as these trains no longer go via Redhill. This will reduce off-peak journey times by around five minutes.

## May 2018

In 2018 Horsham will become part of the Thameslink network with direct services to Peterborough via Redhill, London Bridge and stations through central London, operated by new-build class 700 Siemens trains.

# Stations

We will be working in partnership with Network Rail and the Department for Transport on plans for a major enhancement of Gatwick Airport station.

All stations on the franchise will benefit from a share of the £50m investment planned in improving station facilities and appearance. Our investment programme for stations includes funding for more CCTV, toilet refurbishments, new retail facilities, help points and car park improvements – as well as plans for increased cycle storage and improved transport integration. More details on specific plans for individual stations will be provided at a later stage.

## Free WiFi

Free WiFi is planned to be introduced at 104 of the busiest stations across the Govia Thameslink Railway (GTR) franchise.

## First to last station staffing

First to last station staffing will be introduced at Crawley – as part of plans to provide first to last staffing at the 101 busiest stations on the GTR franchise.
